

COMCON

Broadcast & Media Solutions

Comcon is a leading solutions provider for the broadcast and media industry in India. It is among India's foremost Radio & TV infrastructure and equipment marketing company, and has several completed several System Integration projects during the 25 years since its inception.

Comcon has developed expertise in allied technologies like Information Technology, RF and Microwave, vital to the integration of broadcast systems. With sound technical expertise in audio, video, IT and RF, Comcon today is uniquely placed to execute mid to large size projects integrating diverse technologies and platforms.

Comcon has established a strong customer base in both the private as well as public sectors in India. Comcon sells both directly as well as indirectly to radio and TV broadcasters across the country. Comcon is the first company of its kind in the Indian Broadcast Industry to have secured the ISO 9001:2000 certification for its operations. Financial capabilities of Comcon are strength in itself and there is sufficient available capital with the company to handle multiple large projects at the same time. The leadership at Comcon includes three members with over 35 years experience in the Indian Broadcast industry along with other managers and specialists.

Enabling Broadcast, across India

Team COMCON:

The management team at Comcon is unique by its diverse character – specialized expertise is available in house through the various team leaders. Be it financial, logistics, technical, project management or simply youth and innovation, we have it all in our leadership team.

Comcon has several professionals, with over 35 years of experience in the broadcast industry, working full time. Notable among these are Mr. Rakesh Aggarwal, Mr. K.R.P. Verma (retired ex Managing Director, BECIL, India and now, Managing director of the Turnkey Projects Division – Comcon Technologies Ltd) and Mr. P.K. Bansal (retired Deputy Director, All India Radio and now, Director, Radio Projects).

Well recognised professional of repute in the industry include, Mr. Krishan Sanghi (ex country Manager for AVID and Pinnacle Systems and now, Director, TV Projects) and Gaurav Aggarwal (ex BIG FM, and now Director, Marketing). The company relies heavily on the expertise of Mr. Suresh Gupta and Mrs. Usha Aggarwal who have been key contributors in the company's growth right from its inception in 1983.

Projects Completed:

- Installation and commissioning of India's first fully networked Digital National Broadcast Centre for All India Radio with integrated news (one of Asia's largest) system and 27 ON AIR studios in a paperless work flow.
- SITC and 24/7 operation of fully automated 3 channel TV play out system with ingest and editing capabilities.
- Design, fabrication and commissioning of the first ever DSNG van for Doordarshan, Delhi – the first ever in India.
- Design, fabrication and commissioning of the disaster management vehicle with diverse communications capability in a small 'air lift' package size.
- Supply of radio equipments (from Wired PI racks and radio equipments to cables and connectors) to more than 100 private FM radio stations during the second phase expansion across the country
- Largest Single order for our principle Sonifex Ltd of United Kingdom of 300 nos. Courier Ultra Portable Digital Recorders, supplied to AIR.
- Supply, commissioning and user training of 54+ audio precision analyzers to All India Radio and imparting training to the staff on its operations.
